Plant List

CMC Paper Mail 300 Inserter (X 2)

Our 6 station inserting machines are capable of inserting material in a range of sizes, up to C4 size pockets/wallets, operating capacity from 4-8K items per hour. C5 items 12-20k items an hour and DL 20-30K items an hour depending on materials, size and number of inserts.

Bell & Howell Philipsburg Inserter

The 4 station, workhorse of the mailing industry, will insert up to 4K per hour into C5 wallets depending on material and size

CMC SH30 Polywrapper

6 station polywrapper.

Capable of wrapping DL-A3 size items in clear or printed polythene.

4-12K items per hour depending on material and size.

Hand Inserting Team

For specialist mailers, poly and paper. Prices start from £45.00 per K, depending on size, quantity, format & complexity.

Imaje Inkjet - Mailjet Classic

To work in-line with the CMC Papermail inserter or SH30 polywrapper. Also able to feed a wide range of other items for ink jetting, i.e. from cards/tickets to catalogues for numbering or coding. Solvent based so can also print onto non-porous substrates.

Imaje Mailjet Impression

The first Imaje Mailjet Impression in the UK. Has 2 print heads and can print up to 600dpi in 2 separate zones. The 2.5inch head can deal with longest addresses whilst the 1inch head will simultaneously apply a PPI or logo. Ideal for addressing envelopes off line, which will enable all inserters to

work on the same mailing or on it's own to improve the presentation of a mailpiece. Only certain paper types work with this inkjet printer, we have tested various types, please see attached.

Database Management

Include Match It software (mailsort, deduplication, suppression and MPS licensee). Universal Suppression Service.

GUK 4 Plate Folder

Will fold up to 4 parallel folds.

HP9000 laser Printers X 2

90ppm, mono simplex/duplex laser printing facilities.

Xerox N4525

45 ppm, mono simplex/duplex laser printer

AMS Acufast

Disc tabbing machine
